

Knolle & Young Associates

515 Capital of Texas Hwy, Suite 100
Austin, TX 78746
(512) 472-4011
(888) 881-1599

Fees

New Patient Exam:	\$130.00
Established Patient Exam:	\$110.00
Contact Lens Evaluation:	\$ 20.00
Refraction:	\$ 25.00

Refraction is the process of determining the eye's refractive error, or need for corrective lenses. It is an essential part of an eye exam, but Medicare or most insurance companies do NOT cover it.

Renewal of contact lens prescription requires an additional evaluation, not covered by most insurance companies. There is an additional fee for this service as well.

Refraction fees and contact lens evaluation fees will be collected at checkout in addition to any insurance co-pays.

I have read the above information and understand that **refraction and contact lens evaluation fees are non-covered for Medicare and most insurance companies.** I accept full financial responsibility for the cost of these services. The co-pay is separate from, and not included in, these fees.

Contact Lens Information

Poor quality lenses can result in the following complications:

- Swelling of the cornea
- Pain
- Warping of the corneal curvature
- Reduced vision
- Increased risk of secondary infection

We do not sell contact lenses and we do not fit contact lenses. We will evaluate all soft spherical contact lenses to determine placement of the lens on the eye, visual acuity, adequate tear flow and general health of the cornea.

Quality control is our major concern and goal for patients who wear contact lenses. Medical Center Optical is adjacent to our office, which we recommend with confidence for your contact lens needs. Sam Johnson, ABOM is a Certified Master Optician, one of the few in Texas. All of their opticians are certified and highly trained. Our years of working with Mr. Johnson have given us the confidence in his level of expertise and high standards in quality and care for your eyes.
